Topic/Objectives: 13-2 Mining; (1) Identify the types of resources that are		Name:	
mined, (2) Describe different methods used for mining, (3) Explain how metals		Date:	
are processed.		Period:	
Essential Question: How are mineral resources accessed?			
Questions:	Notes:		
•	What is mined?		
	 Metals, non-metallic minerals, and fuel 	 Metals, non-metallic minerals, and fuel sources are	
		salts).	
		gas, etc).	
	Mining Methods and Processing Many different are used to access resources, each with		
	their own cost and benefit.	•	
	 Examples: strip mining, 	mining, open-pit mining, solution	
	mining, undersea mining.		
	 Mined materials need 	after being removed before they	
	can be used.		
	 Ores must be broken down and valuable 	Ores must be broken down and valuable minerals	
	 Most metals require – the melting and combining w 		
		other metals or chemicals – before they may be used.
